Open the Autocad program, go to File -> New -> DWG/PDF file, or shortcut N through the program menu. Open your AutoCAD *.dwg file from the folder where you've placed the autocadkey.bat file (usually C:\Users\Eagleon\Desktop\AutoCAD). Click on Load File (the pencil icon in the top left) and load the AutoCADkey.bat file (you may need to make AutoCADkey.bat the active document). Save it as autocadkey.dwg in the same folder. Open AutoCAD, you'll find the autocadkey.dwg file, and you should have the autocadkey loaded into the program. Close the file and your file should now be available to be opened by the autocadkey.bat file.
