I've been an AutoCAD Crack For Windows user since 1994. And, I'm a huge fan. It does everything I need it to do, and it's got just the right amount of functionality for my work. Plus, I find it much easier to use than its main rival, Creo. I'm a freelance engineer who works a lot in collaboration with others in my office. We use both AutoCAD and Creo, which is also a very good CAD tool. I used to use AutoCAD for desktop and web-based drawing, but, when my company migrated to the cloud, I switched to Creo. I find it a little bit easier to use, and it's easier to share files between the cloud and my desktop and mobile devices. What I like about AutoCAD is its power, simplicity, and ability to work from a variety of devices. I'm a big fan of the cloud, so having access to a single file on multiple devices is great. Ferguson police chief says protests won't stop Demonstrators take to the streets of Ferguson, Missouri, following the decision not to charge a police officer in the shooting death of 18-year-old Michael Brown. The officer, identified as Ferguson Police Officer Darren Wilson, has become the center of national attention as a result of the unrest. (The Associated Press) FERGUSON, Mo. — Police Chief Thomas Jackson said Tuesday that protests won't stop as residents demand answers and an independent investigation into the fatal shooting of Michael Brown. Jackson was asked about the desire of some to see the officer charged with the Aug. 9 shooting and whether Wilson will remain on the force. Jackson said Wilson is "still a Ferguson police officer," but he added, "He doesn't have the power to fire anyone." "He doesn't have the power to remove officers from the Ferguson Police Department," he said, "so I don't know what we can do to address that concern." The American Civil Liberties Union, which has been monitoring the situation in Ferguson, said in a statement late Tuesday that "officers are not above the law," and it called for Wilson to be charged. Meanwhile, Missouri Gov. Jay Nixon said he would use the power of his office to assign the U.S. Department of Justice to investigate the case. "We believe that ultimately what's best for Ferguson is an independent investigation," Nixon said. Nixon said the investigation will take into account whether any of the more than 1,000 protesters who were arrested were justified in their actions. Tensions have been high since Brown was fatally shot Aug. 9 by police officer Darren Wilson. About 400 people gathered at a protest Aug. 19 in St. Louis. Nixon said protesters are engaged in "nonviolent demonstrations" and that law enforcement officials are only "sparing no effort" to quell the unrest. He spoke after a riot at a Ferguson police station on Monday in which at least six officers were injured. A St. Louis County grand jury began hearing evidence Monday and is expected to release a decision about whether to charge Wilson later this month. On Tuesday, demonstrators marched through the streets of Ferguson for
