credentials: User: Admin Password: admin Before trying this software, you need to have SQL knowledge and skills to install and configure the application. A Full Work Order Management System with Reporting & Invoicing Whether you're a small or large business, work order management is an important part of maintaining the health of any business. In this day and age, people have high expectations for customer service and work order management is a critical part of keeping customers happy. The Work Order Management Software Application will give you the power to track, manage, and report on work orders, time cards, projects, invoices, and more. Does your business have work orders that need to be updated or captured? Do you need to be able to easily manage invoices that your customers pay online? Do you need an easy way to track projects and be able to give your employees a real-time view of what's being worked on and when it's expected to be completed? If your answer to any of these questions is "yes" then Work Order Management Software is the solution you need. Work Order Management Software Overview The Work Order Management Software is perfect for small and large businesses alike. With the included Reporting & Invoicing features, you can do more than manage work orders and invoices. You can also use the app to record expenses, monitor employee time, and track hours. The software will work for any business that uses Microsoft Office for their invoicing system and doesn't have access to an integrated CRM system. What's Included? With the Work Order Management Software, you get full control over the back-end and front-end of your business. You can create your work orders and capture customer invoices, track the status of projects, and even report on completed jobs. The software is designed to work with your employees and their methods of time keeping. This is a great tool for project management, tracking time, and invoicing. The software has a few pre-made reports that you can use to easily monitor project completion and ensure you're getting the most out of your employees. The Reports feature is designed to allow you to view everything that is going on within your business. You can look at jobs that have been completed and how much time was spent on each project. You can also monitor invoices that have been paid and create reports

System Requirements For Encompass Business Management Software:
