## Skype Search Chat Conversation Messages Software Crack For Windows [Latest 2022]

[Download](#)

**Skype Search Chat Conversation Messages Software Crack + For PC [Updated]**

Skype Search Chat Conversation Messages Software is a simple to use application which enables you to quickly identify messages saved in the Skype history logs. The software allows you to search by contacts and by key phrases/words, through the lists of sent or received messages. Reliable searching engine Skype Search Chat Conversation Messages Software allows you to search through the list of messages you exchanged with any of the contacts in your list. It can display all the chat partners in a list, where you can view them, by their Skype usernames. In order to reduce the searching time, you may deactivate the users you are sure you have not

---

communicated with. The software can browse the Skype message history logs and read the messages you sent or received to/from all the selected contacts. Simply enter a keyphrase and activate/deactivate the matching case option. The software can display the messages in which it detects identical phrases/words with the ones you mentioned. Extract information from old messages

Skype Search Chat Conversation Messages Software does not allow you to open and view the entire message, from the list of matching items. However, it does display the username, the field in which the text was found and the detected part of the key phrase/word. The software offers you the possibility of saving the messages and their contents to a text file or to an Excel spreadsheet. You may also copy the content of the selected message to clipboard or remove the entries from the logs. The software allows you to delete the messages containing a particular word or phrase, which you are required to provide - it might not be the same as the keyphrase. Identify Skype messages with a few simple moves

Skype Search Chat Conversation Messages Software is simple to use and can easily search through Skype's history logs, for the desired keyphrases. The software allows you to identify the messages that contain a particular name, word or sentence, then save the content to a text file or a spreadsheet.
